Panasonic Introduces New Combined Heat Recovery Box to Connect Multiple Indoor units.

Panasonic introduced their combined solenoid pipe controllers in the Canadian market.

CZ-P456HR3
CZ-P4160HR3
x 4 ports

CZ-P656HR3
x 6 ports.

CZ-P856HR3
x 8 ports

The new boxes are designed for use with Panasonic's 3-way heat recovery VRF system and provide faster installation time and reduced space requirements to achieve simultaneous cooling and heating operation with heat recovery between indoor units or zones operating in different modes i.e. heating or cooling.
